PART A – Website Planning & Documentation

1. Website Specifications

a) Website Objective & Business Goals

GearUp Store is an e-commerce website designed to sell high-performance sportswear and fitness accessories to athletes and gym enthusiasts in Botswana and across Southern Africa.

The primary business goals are:

- Provide an accessible online platform for purchasing sportswear without visiting a physical store.**
- Increase brand visibility and reach a wider customer base through a professional digital presence.**
- Streamline the shopping experience with an intuitive product catalogue, cart system, and checkout process.**
- Build customer trust through clear branding, consistent design, and easy contact/feedback channels.**
- Grow revenue by showcasing featured products and promotions on the homepage.**

b) TARGET AUDIENCE

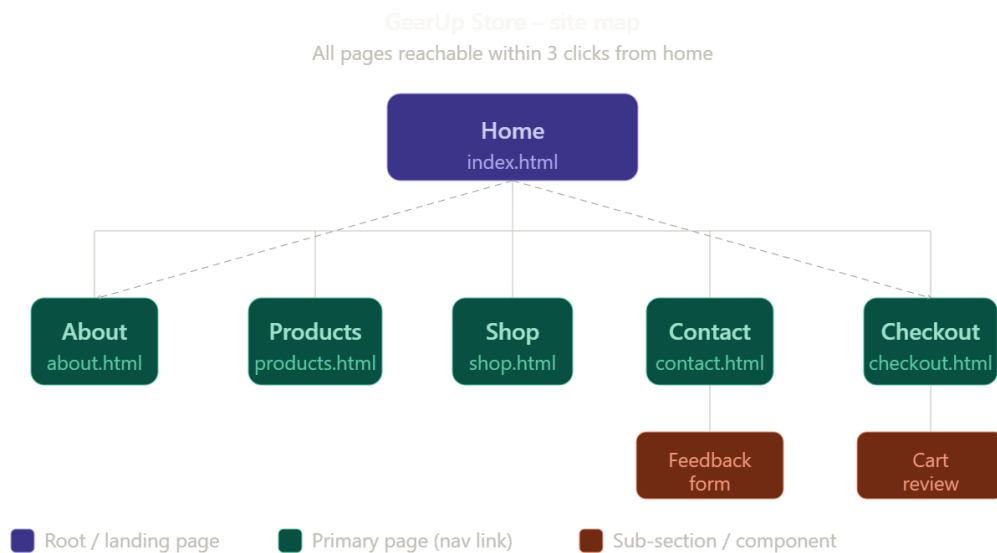

I.2 Target Audience

Attribute	Details
Age Range	18 – 40 years old
Gender	Male and Female
Location	Botswana (primary), Southern Africa (secondary)
Interests	Gym training, athletics, fitness lifestyle, sports
Income Level	Middle income – able to afford quality sportswear
Technical Aptitude	Moderate to high – comfortable shopping online, using mobile devices
Device Usage	Primarily smartphones; also laptops and tablets

c.) Type of Website

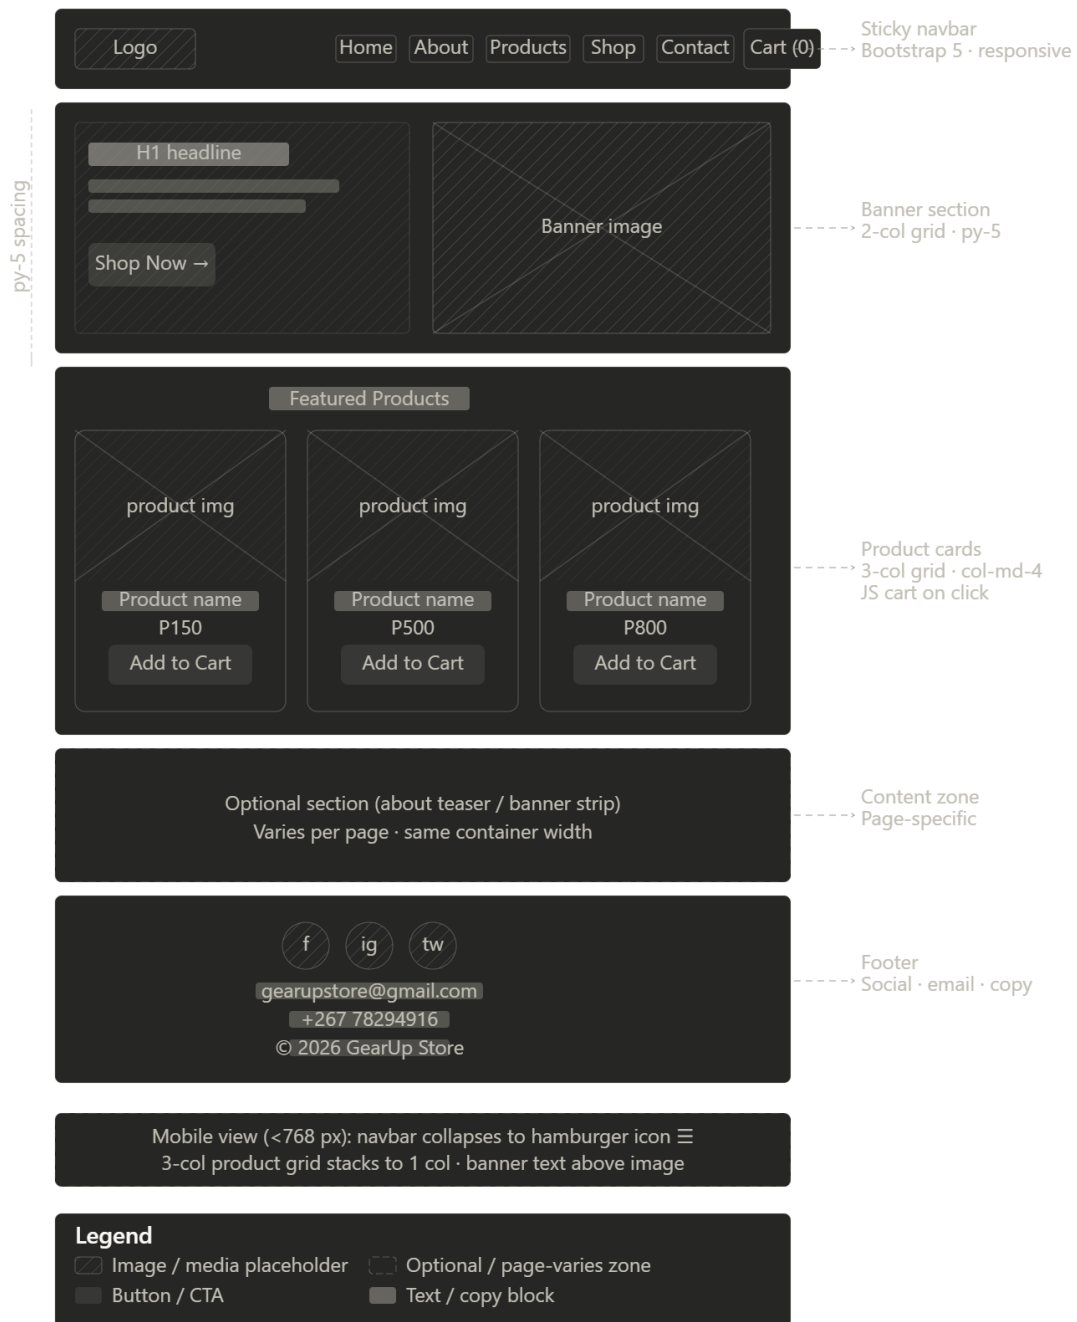

GearUp Store is a Business-to-Consumer (B2C) e-commerce website.

2.) Site Map

3.) Wireframe

GearUp Store – page wireframe (index.html)
Consistent template across all pages · 680 px viewport shown

4.) . Technical Brief

Technology / Tool	Version	Purpose
HTML5	5	Semantic structure and content markup for all web pages
CSS3	3	Custom styling, animations, and layout via external stylesheet (css/style.css)
JavaScript (Vanilla)	ES6+	Cart functionality (js/cart.js) – add to cart, count update, messaging
Bootstrap	5.3.3	Responsive grid system, navbar, card components, and utility classes
Font Awesome	6.5.1	Icon library – social media icons, WhatsApp icon in footer
Visual Studio Code	Latest	Primary code editor with HTML/CSS/JS extensions
Git & GitHub	Latest	Version control and source code hosting
GitHub Pages	—	Free static website hosting and deployment
GIMP / Canva	Latest	Logo design, banner images, and product image editing
Google Chrome DevTools	Latest	Browser testing, responsive design inspection, debugging

5. Quality Assurance (Testing)

Tested on Google Chrome(Desktop, Mobile),Microsoft Edge and it functions well

6. Publishing & Promotion

The GearUp Store website is hosted on GitHub Pages, a free static hosting service provided by

GitHub. The following steps and Git commands were used to publish the website:

Step 1 – Repository Creation

git init

git remote add origin https://github.com/[username]/[repo-name].git

Step 2 – Stage and Commit Files

git add .

git commit -m "Initial commit – GearUp Store website"

Step 3 – Push to GitHub

```
git push -u origin main
```

Step 4 – Enable GitHub Pages

In GitHub: Settings > Pages > Source: main branch > / (root) > Save

Step 5 – Ongoing Updates

```
git add .
```

```
git commit -m "Update: [description of changes]"
```

```
git push
```

7. Future Developments / Recommendations

The following enhancements are recommended to improve GearUp Store in future iterations:

- **Payment Gateway:** Integrate a local payment solution such as Orange Money or FNB eWallet , as well as international options like PayPal or Stripe.
- **Search & Filter Functionality:** Add a product search bar and category/price filters to improve product discovery on the shop page.

- **Customer Reviews & Ratings:** Allow verified buyers to leave ratings and reviews on product pages to build social proof.

- **SEO Optimisation:** Add meta descriptions, Open Graph tags, structured data

(Schema.org), and a sitemap.xml to improve search engine visibility.

- **Accessibility Improvements:** Conduct a full WCAG 2.1 audit and address contrast ratios, keyboard navigation, and ARIA labels to make the site accessible to all users.

- **Newsletter Subscription:** Add an email signup form integrated with Mailchimp to build a customer mailing list for promotions.

- **Progressive Web App (PWA):** Convert the site to a PWA with a service worker for offline functionality and an install-to-homescreen feature on mobile
